The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by le Gauyer.

le Gauyer shows a molded header tank with an open end bounded by flange 42 through which a tank mounted oil cooler can be inserted. Guides 62 receive flanged fittings of the oil cooler and align the fittings with openings in a side wall of the tank for connection to inlet and outlet pipes. Regarding claim 8, note the closed end of slot 62 defined by semicircular edge 76.

Claims 2-7, 9, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 11 is allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references show various guide means employed with in-box mounted oil coolers for header tanks.
